

Overlap System FACT SHEET

FALL APPLICATION GUIDELINES

- October 10 to freeze
- Do not apply to frozen or snow-covered ground
- Rainfall after harvest and prior to application will settle residue and allow for better coverage

» CORN «

Fall Burndown	Spring Burndown	In Season
Authority [®] MTZ DF 10–14 oz/A	Anthem [®] 7–10 oz/A	Anthem 5–8 oz/A with or without Atrazine 0.5–1.0 lb a.i./A
PLUS	OR	OR
Dicamba or 2, 4-D LV4 Premix 24–32 oz/A	Anthem 7–10 oz/A + Atrazine 0.5–1.0 lb	Solstice 2.5 oz + Anthem 4.5 oz/A or Anthem ATZ 1.25 pt/A
OR	OR	OR
Dicamba 8–16 oz/A	Anthem ATZ 1.75–2.5 pt/A	Solstice [™] 2.5–3.15 oz with or without Atrazine 0.5–1.0 lb a.i./A
OR	PLUS	OR
2, 4-D LV4 16–32 oz/A	2, 4-D LV4 16 oz/A + Glyphosate* 22–48 oz/A	Anthem ATZ 1.5–2.0 pt/A
PLUS	OR	OR
Glyphosate* 22–48 oz/A	Liberty [®] herbicide 29–32 oz/A + 2, 4-D LV4 16 oz/A	Cadet [®] 0.6–0.9 oz/A + Atrazine 0.5–1.0 lb a.i./A
		PLUS
		Glyphosate [®] 22–48 oz/A
		OR
		Liberty 29–32 oz/A

*All glyphosate rates are formulation dependent.

ADDITIONAL GUIDELINES

- Burndown and post applications, use a minimum of 15 GPA with flat fan nozzles for optimum coverage
- Follow 2, 4-D and dicamba label specifications for planting intervals to soybeans or corn
- In-season postemergence applications of Anthem/Anthem ATZ can be made up through the V4 stage on corn; Solstice applications can be made through the V8 stage
- All postemergence applications should be made when emerged weeds are small (<4 inches) for best control and yield protection

	Authority MTZ 12–18 oz/A	
	PLUS	
	2, 4-D LV4 16 oz/A	
	PLUS	
	Glyphosate* 22–48 oz/A or Liberty [®] herbicide 29–32 oz/A	

*All glyphosate rates are formulation dependent.

**Do not exceed 0.375 lb a.i. of sulfentrazone between fall and spring applications.

ADDITIONAL GUIDELINES

- Burndown and post applications use minimum of 15 GPA with Turbo or XR flat fan nozzles for optimal coverage
- Follow 2, 4-D label specifications for planting intervals to soybeans and corn
- Do not repeat the same Authority brand application in fall and spring season. Give preference to formulation with a different mode of action.
- In-season Cadet or Marvel plus glyphosate applications should be made 21–28 days after planting
- Heavy weed pressure include residual (Warrant[®] herbicide 3 pt/A) with in-season Cadet or Marvel + glyphosate application
